

RONDO BUILDING SERVICES STRENGTHENS SECURITY

An Enablis Case Study

MAIN PAIN POINTS

NEEDED VISIBILITY 24X7X 365

SMALL IT TEAM WITHOUT ALL THE RESOURCES TO RESPOND AND REMEDIATE BREACHES

REQUIRED A MORE ROBUST SECURITY SOLUTION IN LINE WITH BUSINESS NEEDS

NEEDED TO GIVE THE BUSINESS PEACE OF MIND TO HAVE THE BUSINESS SECURED

HAVE THE BUSINESS STRUCTURE SECURE, 24 X 7 MONITORING WITH UNBREACHABLE SYSTEMS

Rondo Building Services is a highly focused business involved in the manufacture and supply of a wide range of light gauge rolled formed steel products and systems, primarily for the construction industry in Australia, New Zealand, Asia Pacific and the Middle East. The focus is "To provide our customers with the industry leading systems solutions incorporating high quality roll formed products and accessories complimented by outstanding customer service."

“ As Rondo Building Services was looking to strengthen our security status with top tier products, it was important to work with leading partners to provide a superior security solution with seamless implementation. We have developed an ongoing relationship with the Enblis team to support our business, said Andrew Paton, General Manager ICT Services. ”

RONDO'S KEY BUSINESS OBJECTIVES FOR THE ENBLIS & CROWDSTRIKE SOLUTION

- Complete visibility
- 24 x 7 x 365 coverage
- Having a breach warranty - with a guarantee and measure that provides peace of mind
- Secure systems and data
- Increase in morale
- Peace of mind once Falcon Complete and Falcon Spotlight was implemented

“ In my role I’m responsible for the strategic direction of the business - to create and execute an IT and security strategy, so security is a key priority for our processes, staff and data. ”

Andrew Paton, General Manager ICT Services.

HOW IMPORTANT IS SECURITY TO RONDO

Security is top of mind for our business and part of board level discussions, where IT Security strategies are approved by the Rondo board.

As a construction and manufacturing supplier security is extremely important to all areas of our business due to the process involved in our product and supply processes.

“We consume about 350 tonne of steel a day. Production runs 24/7 and the computer systems are tightly integrated into the manufacturing floor. Orders are fed down to the floor equipment and production data is fed back up into our data warehouse. Steel is ordered automatically by the system around the clock as it is consumed. Therefore, if any part of the IT system goes offline it will likely affect production. IT security is of critical importance to the environment.” added Andrew Paton, General Manager ICT Services.

Given that Security is a key part of the manufacturing process, myself and the team required a world class solution to ensure complete coverage and visibility 24x7.

Security is a key part of the manufacturing process and if there was a security issue it could bring the business to a halt and affect our customers.

THE SOLUTION

WHY RONDO CHOSE CROWDSTRIKE AND ENBLIS

Rondo wanted one solution with multiple capabilities and were able to access 6 different security solutions that included; AV, EDR, IT hygiene, Vulnerability management (VM), CrowdStrikes team of threat experts provided 24x7 monitoring and response plus a breach warranty.

- CrowdStrike provides leading-edge world-class products
- The CrowdStrike warranty
- We put in the Crowdstrike solution, and it works
- I don't have to tend to it and allocate extra resources to it
- Enblis provides a Zero Trust platform to ensure all data and business apps are protected
- Enblis work as part of our team
- Enblis partners with world class security vendors like CrowdStrike
